Hello Doug,

We look forward to connecting with you about the donation. I think there may be some confusion. We do allow life jackets if they are US Coast Guard approved. We also encourage the use of life jackets especially in open water. Please let us know what type of jacket you will be donating and how many.

We would love to tell you about our drowning prevention programs and FREE SWIM LESSONS. Hopefully you can use us as a resource to help everyone learn to swim. I am familiar with Roxie's story and the passionate work you do. Thank you for your persistent efforts to save lives.

Would you be available for a call this week?

Hello,

My beloved daughter Roxie drowned at an LA County summer camp in 2019. My wife and I honored her by establishing the state's sole childhood aquatics and camp safety foundation. In fact, we are the only camp safety foundation in the nation.

In 2021, we successfully passed a perennial statewide resolution declaring the third week of every May *Roxie's Wish: Drowning Prevention Week for Children.* A year later, my wife Elena died. In her honor, I successfully passed the *Elena Matyas Camp Safety Ordinance* and the *Roxie Swim Safe Ordinance* in LA County. The former Mayor Garcetti, Representatives Schiff and Chu and Supervisors Solis and Barger are a handful of the many people who have supported our efforts.

Los Angeles is about to kick off aquatics and camp seasons. Since *you list roughly 150 camps* (with quite a few involving aquatics activities) and since you have quite a few pools and open waterfronts, *I* am willing to donate to your camps and aquatics facilities an abundance of life jackets from our inventory.

I have been told that the city has discouraged life jackets from public pools, primarily because they might give parents and guardians a false sense of security that their children are OK. This belief has no foundation in fact or data. Life jackets for learning swimmers should be a mandate, not an exception. This is why we donated 100 life jackets to LA County open waterfronts last year. And, we are happy to carry on the tradition with you this year.

Please let me know as soon as possible if you are interested... hope so!

Warmly, Doug Forbes, President

"Making Camps and Aquatics Safer for Kids."

To whom this concerns:

As a nearby resident in the south Griffith Park area, I am excited about the possibility of a new Community Center in the area based on the Master Plan presented February 29, 2024 at a community meeting in Los Feliz. Our esteemed local groups, the Los Feliz Improvement Association (LFIA) and the Griffith Park Advisory Board (GPAB), have supported a community-driven Master Plan, which was NOT what was presented at the 2/29/24 meeting put on by the local 4th Council Office.

I understand from the community meeting the money immediately secured by CD4 is earmarked for the Griffith Park pool, some for planning for the Master Plan, and a consultant. That is some progress after 4 years yet NOT enough.

The recent community meeting of 100 plus attendees did not directly address the need for the community center that we want to be located on the site where the L.A. Shares building stood for years until homeless from the adjacent Bridge Home shelter and their affiliated criminals burnt it down, requiring the longstanding L.A. Shares building to be raised. The community was promised in 2020 through a passed Council Motion under then CD4 Councilman David Ryu that the community center would be cited where LA Shares building was located. Ryu's Motion also called for the current location of the Bridge Home shelter to return to a parking lot.

We are NOT okay with what was promised as a temporary Bridge Home shelter staying in the area that provides no revenue to Griffith Park Rec & Parks Dept. and is an established locus of crime and draw for homeless who use drugs without shelter operator (PATH) intervention!

Though in attendance, and while directly asked during the Master Plan meeting, CD4 Councilwoman Raman did not address a timeline for decommissioning the shelter in Griffith Park. Councilwoman Raman has refused to report back to the RAP Commission from the June 2023 for a shelter closure timeline as requested by the RAP Commission Board. Our community has been more than patiently waiting for our elected Council representative to report back for over a year.

The Bridge Home shelter for the past 3.5 years has increased crime 300% to the immediate neighborhoods of Los Feliz and created a 468% increase in homeless to the area due to drugs

being readily available. The element of prostitution has increased in our neighborhood as well with drug-addicted women trading sex for drugs from shelter residents and gang members, as well as payment for sex by men who buy drugs outside the shelter.

It is also my understanding that all dogs belonging to shelter residents must be leashed, however, there have been 3 separate instances over the last 2 years where my (leashed) dog has been attacked by unleashed shelter resident dogs, a different dog each time, and the latest instant resulting in me falling and lightly injuring my leg. I should not have to feel forced to walk on the other side of the street each time I walk in the direction of the Bridge home.

The safety of our Los Feliz community and Griffith Park is PRIORITY ONE. I implore the Rec & Parks Commission Board to work with our local community groups to close the shelter, while listening to our voices about details important to the creation of a functional adult community center that facilitates safety both within south Griffith Park and at the community center specifically. Our Councilperson's agenda does NOT represent the peoples' voices in Council District 4 who recreate near the Bridge Home shelter. We have endured enough!

The Ambassador Program as proposed by Council District 4 Representative Raman to have 2 staff outside the facility to "deescalate" at the Bridge Home shelter and pass out already available Narcan, call police and fire with limited hours, will be insufficient and will create a liability for Recreation & Parks -- an anemic safety measure. As I understand, these personnel will be recruited from a yet-to-be identified third party vendor and will not have law enforcement training nor training or experience in clinical psychology, which is what is needed to ensure the safety of the Ambassador Program staff and shelter residents. Such a measure will merely add untrained staff, and will not aid in increasing the safety around the Bridge Home shelter that we in the surrounding community have already called for on multiple occasions to be removed. We need safety NOW in south Griffith Park and to have our voices heard by the RAP Commission Board because we are being gaslighted by our Council District 4 representatives.

Please reply to my letter at

The favor of a reply addressing the above issues by setting a timeline to decommission the shelter is appreciated in advance.

A few months ago an email was sent to the parks and rec informing that Queen Anne Park staff have acted wrongfully

With some kids, park Director Renaco has agreed to other wrongful behavior of the staff, people mentioned that have found

Trophies and pictures from past Baseball and Basketball seasons in the trash and that the parents were not contacted to sort

Them out, people say that a member of the staff Waverly Brown charges a quote from parents to practice indoor basketball,

Since when a city worker can be charging for practice and gym time when the park should be for the public unless the park

Organizes a basketball tournament then we all know we have to pay to participate also Waverly Brown currently has a

Sundays basketball tournament running from 9 am to 5 pm, are these people profiting from this tournaments, isn't that elligal?

Why there is so much attention to basketball when baseball season started late due that there were no coaches and no kids

Why a group of people just worry about one sport? Are they making side money from this? Also people said that Waverly Brown

Has a relationship with one of the staff girls that work there and that some times they show it in front of the kids, isn't that wrong?

we've seen many good people come and go over the years at this park but this time is the worst, you have too many people in payroll

At this park that don't do anything but seat on their butts and other making profit and taking advantage of people, we need a change

please bring fresh ideas to Queen Anne Park.

# Venice Neighborhood Council

May 8, 2024

General Manager Kim, Esteemed Commissioners, and Councilmember Park,

On April 16, 2024, the Venice Neighborhood Council Board of Officers passed the following motion 18-0-0:

The Board of Officers of the Venice Neighborhood Council supports the creation of a Butterfly and Pollinator Garden in Centennial Park as described in the attached proposal, to accompany other features in the park.

Butterfly & Pollinator Garden Proposal:

https://www.venicenc.org/assets/documents/5/meeting661b09af4041d.pdf

Sincerely,

Brian Averill President

Venice Neighborhood Council

**BACKSTORY** Not only are butterflies beautiful and fascinating, they, together with other pollinator insects, are essential to the existence of all fruit and vegetable bearing plants.

Over 180 butterflies are native to Venice. Unfortunately, 90% are no longer here due to habitat loss, including the loss of native plants, climate change and herbicides.

Western Monarch Butterflies migrate between the Rocky Mountains and our coastal beaches, including Venice. Migratory monarchs are now classified as endangered by the International Union for Conservation of Nature.

**DIET** Native Milkweed is essential for eggs, chrysalis & caterpillars; the butterflies need pollinator flower nectar and native host plants.

PROPOSAL FOR CENTENNIAL PARK Our proposal is to plant Milkweed and native Pollinator host and flowering plants in the currently bare spaces in Centennial Park. The precise locations for planting in Centennial Park will be determined together with LA Department of Recreation and Parks (RAP), to create a beautiful and important habitat for all butterflies, including monarchs, and pollinator insects.

Discrete informative signage will accompany the plantings, enabling visitors to learn the wonders of Butterflies and Pollinators.

Consistent with the thematic design of Centennial Park, this garden references the history of Venice: Abbot Kinney was an horticulturalist and Venice has an unique ecological history. The garden also ties into resources in the adjacent Venice Public Library and provides opportunities for arts and educational programming for schools and the whole community.

**TEAM** Janin Paine, native Venetian and creator of several Butterfly Gardens in Los Angeles, is our fearless leader. She is joined by the VNC Preserving Places Committee, the Verdant Venice Group, LA Parks Foundation, and numerous volunteers.

**BUDGET** This is a NO COST volunteer project. Plants will be provided by LA Parks Foundation. Labor is volunteers through Habitatz, (Janin's butterfly group),

Verdant Venice Group and Chamber in Action. School and community volunteers and VNC Outreach will be invited. Mulch, irrigation and maintenance will be in coordinated with RAP.

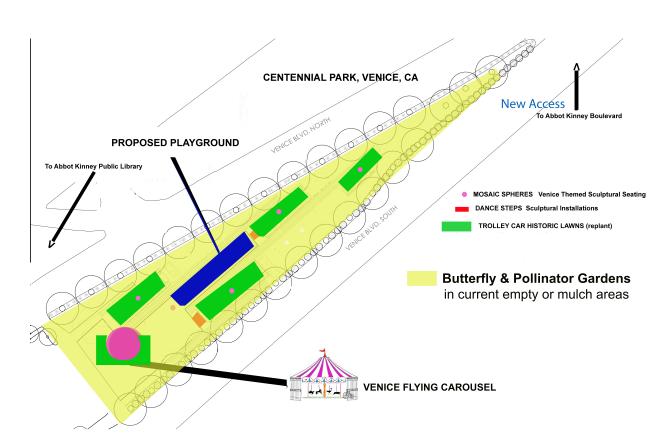

**SCHEDULE** Once approved, we will coordinate preparation and planting with RAP. We anticipate plantings to be done over the span of one month. Phase 2: Creating a swale to collect rainwater and benefit all plantings.

**SITE** Centennial Park is a prominent green space on Venice Boulevard between the Venice Public Library and Abbot Kinney Boulevard. It is designed as a tribute to Venice's fascinating history.

The Butterfly and Pollinator Garden plantings will be within empty garden beds. This complies with RAP's designation of the park for low impact "passive uses."

The plantings will compliment and coordinate with other amenities and projects planned for Centennial Park, such as the mosaic balls, carousel (which also has butterflies), trees (strongly recommended), replanted lawns and benches (requests to RAP) and a proposed children's playground. We also support enabling the proposed pedestrian connection from Abbot Kinney Boulevard through the park and hope the new perimeter fencing will be moved to a more community friendly location. This will all provide for wonderful strolls and delightful experiences for all visitors to the park.

#### SITE PLAN - BUTTERFLY & POLLINATOR GARDEN IN THE EMPTY AREAS.

**PLANT LIST** These are a few of the hundreds of native plants which we would draw from in creating the Butterfly and Pollinator Garden:

Milkweeds (Asclepias fascicularis)

Asclepias species are critical to the survival of monarchs. Adult female monarchs lay their eggs on milkweeds so the young caterpillars can eat these delectable plants. Select milkweeds native to your region to best support the monarch butterflies.

#### California Sunflower (Encelia californica)

Native to coastal scrub, the California sunflower is insect central. Its large, cheerful daisy-like flowers that bloom bountifully from spring to fall beckon numerous native bees, honeybees, butterflies, ladybugs and other beneficial insects. Hard prune California sunflower between fall and late winter to improve its shape

#### Big Berry Manzanita (Arctostaphylos glauca)

With the largest berries of any manzanita, big berry manzanita has a sculptural aesthetic, alluring urnshaped winter flowers and evergreen foliage. Big berry manzanita will reliably grow to 10 feet tall and wide.

Big berry manzanita provides cover for all kinds of wildlife, draws hummingbirds and pollinators to its winter nectar, and brings birds and mammals who eat its spring berries.

#### California Lilac (Ceanothus spp)

The ceanothus has much to enjoy: the striking blue flower clusters in spring, the lush evergreen foliage or the tons of native bees — including cute bumblebees — who feed on it. Many choices include grown covers and shrubs. Ceanothus requires good drainage and wants no summer water after it's established.

Pink Chaparral Currant (Ribes malvaceum)

Fast growing to 5 or 6 feet, pink chaparral currant and its elegant flower tassels bring enchantment to California winter gardens. It provides food for critters throughout the year: hummingbirds and other pollinators covet its nectar in fall, winter and spring, and birds relish the berries from spring to summer.

It can be sited on a border or as a backdrop, or grouped for a low screen.

Liveforever (Dudleya spp)

Dudleyas look especially impressive fall through spring, when their leaves are plumped up. In spring they tempt hummingbirds with a feast of flower nectar. These easy succulents add texture and interest to dry gardens.

All species of Dudleya need a well-drained rock garden or container. Plant Dudleyas with native stonecrops, like broadleaf stonecrop (Sedum spathulifolium).

#### California Poppy (Eschscholzia Californica)

State flower, the California Poppy is known for lighting up entire hillsides on the West coast, their bright orange blooms can be planted and enjoyed almost anywhere. These annuals flower from spring all the way into summer and will often re-bloom again in the fall. Native, easy to grow and tolerant of most soils, bee friendly!

Coastal Live Oak (Quercus Agrifolia) - The Coast Live Oak is an iconic, majestic tree that serves as a cornerstone for wildlife and the surrounding ecosystem. It is easily- recognized by its gnarled branches and grand canopy. The Coast Live Oak flowers each spring and its acorns attract a wide variety of birds and butterflies - over 270 species rely on these trees for habitat and food. With its rich green foliage and unique branching pattern, the Coast Live Oak is a favored choice for both residential and commercial landscapes. It is one of the only California native oaks that thrives in coastal environments, it enjoys fog and mild winters.

# B. Sunny Pollinator Patch

Areas with full sun are perfect for drought-adapted native flowering plants, which also serve as important sources of food and shelter for pollinators and birds.

## 80-140 TOTAL PLANTS (plus seed)

Purple Clarkia (seed) 10-20 Desertbells
1 White Sage 15-25 Blue Grama
1 Toyon 20-30 California Fescue
3 Deergrass 30-60 Common Yarrow

CONTACTS: Janin Paine, Habitatz -
