The 109th Street Pool is located in South L.A, where recreational opportunities for youth at-risk are few. A new pool project would involves the demolition of the old bathhouse building (approximately 7,500 square feet) and swimming pool, built in the 1930s, replacing it with a modern, ADA compliant bathhouse (approximately 5,000 square feet) and swimming pool facility, to include family amenities. A popular mural on the exterior wall of the old bathhouse will be retained if possible. The current facility is not ADA compliant.

#7 Priority for Replacement

The bathhouse was refurbished in 2000, and Recreation and Parks Facility Repair Division completed \$478,000 in repairs in 2002. Work encompassed installing a new surge pit and new piping to filter room. Decking was replaced where it had to be removed for pipe installation and a new stainless steel gutter system was installed. The facility is compliant with ADA. It was not evaluated during the infrastructure study.

Alg	Algin Sutton – Immediate Repairs Needed

Central Pool was refurbished in 1987 but remains in a poor location (behind the recreation center) affecting programming and security. The pool tank is the original 1927 installation and needs replacement. The recommendation is for a total replacement, with consideration of a different park location to better serve this community and restore open, green space. The facility is not ADA compliant.

Originally this pool was a gift from the comedian Lou Costello, who lost his son in a drowning accident, and in his son's memory wished to ensure that neighborhood children could learn to swim. The pool is currently evaluated as failing. The pool is open on a day-to-day basis this summer. Both the pool and the mechanical systems are in need of replacement. The deck has large cracks. The pool tank is leaking through the deep end wall into the filter room. There are no deck drains and both restrooms are in disrepair. The facility is not ADA compliant. The pool's location on a slope compounds the stress on the pool, and a new location should be sought. This location might then be converted to a splash pad.

#2 Priority for Replacement

Council District 1 **Downey Pool**1775 N. Spring Street
Los Angeles 90031

Built: 1918 Rebuilt: 1939 Capacity: 337 people

Other Programs: JUNIOR LIFEGUARD TRAINING

SWIM LESSONS (GROUP, PRIVATE, SEMI-PRIVATE, PARENT, CHILD)

The possibility for continuing operations is marginal. The pool tank needs to be replaced along with all piping and mechanical equipment. Only one-third of pool return piping is operational and the filter system is sinking. Backwashing the pool floods the neighboring property, while the effects of train movements across the nearby tracks further compromise the pool tank. Continuous pool closures due to leaking or other problems prevent staff from sustaining desired programming at the pool. There is no ADA accessibility.

#3 Priority for Replacement

Echo Deep Pool – CLOSED 2003 (YEAR ROUND POOL)

1419 Colton Street Los Angeles 90019

Built: 1982 Capacity: 450 people

Summer of 2003:

The pool served 130,359 patrons

Median Household Income of the Area: \$20,489

Originally graded at a C, this pool was closed late in 2003 when the structural condition of the roof was deemed unsafe, a condition not known during earlier inspections. A refurbishment project is being designed and is funded. The scope of work calls for renovation and structural retrofit of the existing pool building and bathhouse roof, mechanical, electrical, and disabled access upgrades.

To Be Refurbished Funding Identified

Gaffey Street Pool – CLOSED 1989

3351 Gaffey San Pedro 90731

Built: 1944 Capacity: 250 people

Median Household Income of the Area:

\$66.477

The pool building is in total disrepair. The site has some historical significance because of the donation of the pool for public use by the military after World War II, however its location on a hillside may not be the best replacement location because slope failure would create a continuing challenge to a new pool. A study of alternative locations to serve the community would be a first step to bringing a useable pool back to the area.

This pool and building are in very poor condition, with deteriorated concrete throughout and no ADA compliance.

#8 Priority for Replacement

Harvard Pool - CLOSED 2001

6120 Denker Avenue Los Angeles 90047

Built: 1939 Capacity: 360 people

Median Household Income of the Area:

\$24,910

Out of service due to extensive leaks, probably tied to damage not detected immediately after the Northridge Earthquake. This pool had been rehabilitated in 1983. The area is high-need and the pool closure represents a hardship in the community. Work to design a new pool facility, which began in late 2002, is 75% complete, and led to a recent announcement of funding to demolish the old structure and construct a new family aquatic center and bathhouse uilding. Completion of design, the bidding process, and construction, will take approximately eighteen months. The new facility will meet ADA standards. Estimated cost: \$6 million

To Be Replaced Funding Identified

This pool needs to be replaced. There are cracks in the pool tank, deck, and filter room. Both pipes and fixtures leak. Also, the restrooms in the bathhouse need refurbishment and improvements for ADA compliance. Replacement of the entire facility is the viable alternative.

This pool was built in 1950 and was re-piped by Recreation and Parks Facility Repair Division, which also added new pumps, filters, and gutters, in 1994. However, the deck has cracked and needs replacement. The bathhouse requires a complete renovation and improvements to meet ADA standards. The Department also installed a waterslide in 2002, two years ago, which improved attendance.

This pool received refurbishment by Recreation and Parks Facility Repair Division in 2002, for a total cost of \$481,000. Work included installing new pool lights in the large and small pools, replacing lifeguard towers, sealing joints, repainting the tank, and replacing the pool deck. Installation of a new pool heater and all related piping and utilities for the large pool is in progress. The bathhouse needs refurbishment and upgrade for ADA compliance.
